

Alpha Project Instructions

1. Open your terminal.
2. Create a new folder named 'alpha' and move into it:
`mkdir alpha`
`cd alpha`
3. Create a new file named 'Apple' and add the following lines:
`#!/bin/sh`
`date`
4. Make the script executable:
`chmod +x Apple`
5. Run the script to see the current date and time:
`./Apple`
6. Initialize a git repository and commit the file:
`git init`
`git add Apple`
`git commit -m "Add Apple script"`
7. Create a new repository on GitHub named 'alpha' and connect it:
`git remote add origin <your-repo-url>`
8. Push the code to GitHub:
`git push -u origin main`
